

# KQ OneMap Solution

## Background

KQ OneMap Solution integrates multiple information of land-use, economy, demography, mineral resources, etc. in a unified map and allows interactive query, spatial analysis and sustainable sharing. It offers a flexible and configurable platform for users to manage their data effectively. Thus it realizes business information sharing for accurate and timely decision-making.

OneMap is mainly applied to the core business of land and resources. It applies GIS technologies to intuitively, accurately and dynamically display the entire monitoring region.

## Platform Functions

- Land and resources management
- Mineral resources management
- Disaster prevention

- Dynamic supervision and updating
- Demographic and economic monitoring
- Manage data in 2D and 3D
